TECHNICAL SKILLS:

Languages: HTML5, CSS, JavaScript, Python, Java, SQL | **Frameworks / Libraries :** React, Java Spring, Flask, Node, Express, Jinja2, jQuery, Material UI, Tailwind, Bootstrap, Axios, AJAX, **Databases:** MySQL, MongoDB | **Tools:** Git, Git Bash, Github, JSON, Postman, Bcrypt, VS Code, Spring Tool Suite, Balsamiq, Trello, Figma, AWS, Rest API

TECHNICAL EXPERIENCE:

C.A.M.P.S. | Full Stack Developer | [Github](#)

2023

Lead Developer User to register for summer camp

A web based application allowing users to register for summer camp, view scheduled activities, details, and create new activities.

- Worked in an agile team environment, reporting to the daily standup scrum master in a one week development sprint.
- Built the front-end using React to provide a highly interactive and responsive user experience.
- Developed a performant and scalable web app back-end using Java Spring Boot for rapid development and robustness.
- Managed the database using MySQL to ensure the data is well-organized and easy to access for the user.
- Implemented RESTful API for efficient communication between front-end and back-end, ensuring seamless data exchange and enabling better scalability, interoperability, and maintainability of the web application.
- Designed and developed a React dashboard page that empowers users to query a database based on a specific date and a specific activity enabling them to easily and quickly access pertinent information.
- Implemented a system that allows counselors to manage camp activities efficiently and reliably by adding, updating, and deleting them within the app. This feature enabled counselors to keep track of activities more effectively, improving the overall management of camp activities.
- Technologies used: **Javascript, React, Java, Spring, Material UI, Bootstrap, CSS, JSON, Figma, Trello,HTML**

Full Stack Web Application to buy/rent properties in your local area

2022

- Built out registration and login complete password protection using bcrypt, personal information fields with validations, quicker/direct sign in for members by writing a form in HTML and connecting to database with Python
- Utilized MySQL to handle the database; retrieved information using Python to handle routes and components.
- Used Flask and Jinja2 to create dynamic web pages; designed user interface using CSS and HTML.
- Utilized Figma for design prototyping and Trello for project management.
- Technologies used: **Python, MySQL, Flask, Jinja2, CSS, HTML, Figma, Trello**

Mateus Palace Non-Profit | Full Stack Web Developer | [Github](#)

2023

Lead Developer User to donate to non-profit organization

- Implemented a responsive front-end design using React to provide a highly interactive user experience.
- Employed MongoDB with the Express.js backend to store project data efficiently and effectively.
- Implemented server-side rendering and routing using Node.js and Express.js to enhance the performance and user experience of the web application. By implementing server-side rendering, the website loads more quickly, resulting in better search engine optimization and improved user engagement.
- Utilized Git branching methodologies, including feature branches, to facilitate the development process while ensuring a stable and well-organized codebase. By using these techniques, I was able to streamline collaboration with my team members and deliver high-quality code with minimal disruptions to the main branch.
- Technologies used: **Javascript, React, Express, MongoDB, Mongoose, CSS, HTML, Figma, Trello**

ADDITIONAL EXPERIENCE:

Four Seasons Resort and Residences | Restaurant Supervisor Jackson, WY

April 2019-March 2020

- Oversaw employee performance to ensure compliance with company policies, regulations, and safety guidelines to ensure high guest satisfaction and safety environment.
- Consistently engaged with guests and increased overall guest satisfaction by 25% in the guest evaluation survey.
- Led teams up to 15 staff and oversaw over 5 million in revenue; motivated and mentored 3 associates leading to promotions
- Met goal deadlines, allocated budgets, and worked across sales, marketing, payroll and operations teams to ensure teams were properly resourced and on track.
- Responsible for generating a performance report for the Department Head once a month. Measure the output or results produced by the department in terms of staff, volume, or dollar value.
- Assess the quality of the work produced by the department, including customer satisfaction and error rates.
- Evaluate the level of job satisfaction and engagement among employees in the department.

Four Seasons Resort and Residences | Server Jackson, WY

April 2013-April 2019

- Demonstrated exceptional sales proficiency by consistently achieving the highest food sales among servers.
- Consistently provided professional, friendly and engaging service with an average of 500 high expectation clients per day.
- Leveraged strong communication skills, including being fully proficient in Spanish, to effectively engage and build rapport with a diverse range of customers, contributing to increased customer satisfaction in a fast-paced restaurant setting.
