Technical Skills:

Languages: HTML5, CSS, JavaScript, Python, Java, SQL | **Frameworks / Libraries**: React, Java Spring, Flask, Node, Express, Jinja2, jQuery, Material UI, Tailwind, Bootstrap, Axios, AJAX, **Databases**: MySQL, MongoDB | **Tools**: Git, Git Bash, Github, JSON, Postman, Bcrypt, VS Code, Spring Tool Suite, Balsamiq, Trello, Figma, AWS, Rest API

Technical Projects:

C.A.M.P.S. | Full Stack Developer | Github

2023

Lead Developer User to register for summer camp

A web based application allowing users to register for summer camp, view scheduled activities and activity details, and create new activities.

- Worked in an agile team environment, reporting to the daily standup scrum master in a one week development sprint.
- Built the front-end using React to provide a highly interactive and responsive user experience.
- Developed the back-end using Java Spring Boot to facilitate efficient and rapid development of robust and scalable web applications.
- Managed the database using MySQL to ensure the data is well-organized and easy to access for the user.
- Stylized frontend by leveraging Material UI, CSS, and Bootstrap for a modular and customizable architecture.
- Utilized RESTful API for communication between the front-end and back-end to ensure seamless data exchange between the user interface and server.
- Implemented a dashboard page using React that enables users to query the database based on a specific date, providing quick and easy access to relevant data.
- Enabled counselors to add, update and delete activities within the app using Java Spring Boot, enabling efficient and reliable management of camp activities.
- Technologies used: Javascript, React, Java, Spring, Material UI, Bootstrap, CSS, JSON, Figma, Trello, HTML

Cash Flow | Full Stack Web Developer | Github

Full Stack Web Application to buy/rent properties in your local area

2022

- Built out registration and login complete password protection using bcrypt, personal information fields with validations, quicker/direct sign in for members by writing a form in HTML and connecting to database with Python
- Utilized MySQL to handle the database; retrieved information using Python to handle routes and components.
- Used Flask and Jinja2 to create dynamic web pages; designed user interface using CSS and HTML.
- Utilized Figma for design prototyping and Trello for project management.
- Technologies used: Python, MySQL, Flask, Jinja2, CSS, HTML, Figma, Trello

Mateus Palace Non-Profit | Full Stack Web Developer | Github

Lead Developer User to donate to non-profit

2023

- Implemented a responsive front-end design using React to provide a highly interactive user experience.
- Employed MongoDB to store project data and integrated it with the Express.js backend.
- Implemented server-side rendering and routing using Node.is and Express.is.
- Utilized Git branching strategies, such as feature branches, to manage the development process and maintain a stable codebase.
- Technologies used: Javascript, React, Express, MongoDB, Mongoose, CSS, HTML, Figma, Trello

Professional Experience:

Restaurant Supervisor | Four Seasons Resort and Residences, Jackson, WY

April 2019-March 2020

- Oversaw employee performance to ensure compliance with company policies, regulations, and safety guidelines to ensure high guest satisfaction and safety environment.
- Consistently engaged with guests and increased overall guest satisfaction by 25% in the guest evaluation survey.
- Led teams up to 15 staff and oversaw over 5 million in revenue; motivated, assisted, and mentored 3 associates leading to promotions
- Met goal deadlines, allocated budgets, and worked across sales, marketing, payroll and operations teams to ensure teams were properly resourced and on track.
- Responsible for generating a performance report for the Department Head once a month. Measure the output or results produced by the department in terms of staff, volume, or dollar value.
- Assess the quality of the work produced by the department, including customer satisfaction and error rates.
- Evaluate the level of job satisfaction and engagement among employees in the department.
- Measure the time and resources required to produce the department's output, with a goal of identifying

opportunities to improve efficiency.

• Evaluate the quality of customer service provided by the department, including response time and complaint resolution.
